

Word Squares

Puzzle 0165

Society is so polarised in certain countries, that one section of the populace is convinced that a person running around with a semi-automatic **first** is a homicidal maniac, or at best a dangerous **second**, but these in turn regard their critics as peddlers of **third**, while another group only checks the news for the **fourth** numbers and sports results, and none appreciates that the others may have a different **fifth**.
